

A clearer way to write and manage your PhD thesis

A practical, structured workflow for UTS PhD and HDR students, from the first chapter to supervisor review and examiner corrections.

طريقة أوضح لكتابة وإدارة رسالة الدكتوراه

دليل عملي لتنظيم الرسالة، وتتبع التعديلات، ومراجعة المشرف، ومعالجة ملاحظات الممتحنين.

UTS Thesis Template Community

Unofficial, community-maintained, and based on a real thesis workflow

THE GOAL

Spend less time managing files. Spend more time improving your research.

A large thesis quickly becomes hard to manage

Writing a thesis is not difficult only because of the research. The document itself becomes a project. Chapters grow, references move, figures change, feedback arrives, and several versions begin circulating.

The common problem

- One large file becomes fragile
- Old and new versions get mixed up
- Supervisor feedback is difficult to trace
- Examiner corrections become another project

The structured alternative

- Separate files for each part of the thesis
- Git history for every meaningful revision
- Clear review outputs for the supervisor
- Stable records for examiner responses

What changes in practice

1

Organise

Keep chapters, figures, tables, references, and appendices in clear locations.

2

Track

Use Git and GitHub to record what changed and return to an earlier state.

3

Review

Give your supervisor a readable review copy with visible corrections.

4

Respond

Connect each examiner comment to a clear correction and response.

The result

A thesis that is easier to write, review, correct, and prepare for submission.

One workflow from first draft to final correction

The template turns thesis management into a sequence of small, clear stages.

01

Start with structure

Set your metadata, front matter, chapters, bibliography, figures, tables, and appendices before the document becomes large.

02

Write in manageable files

Work on one chapter or section at a time. The main thesis file brings everything together when you build the PDF.

03

Track meaningful changes

Use a Git branch for a focused revision. Commit a clear checkpoint after building and checking the result.

04

Make supervisor review easier

Produce a clean reading copy and a review copy with visible corrections. Keep sensitive material in a private repository.

05

Address examiner comments

Give every comment a stable ID. Record the correction, its location, and the response. Then generate all three outputs.

Three useful PDF outputs

Thesis_CLEAN.pdf

Final reading copy

Thesis_REVIEW.pdf

Visible corrections for review

Revision_Response.pdf

Comment-by-comment response

الفكرة ببساطة

عندما تكبر رسالة الدكتوراه، لا تصبح الصعوبة في البحث فقط. يصبح الملف نفسه مشروعاً يحتاج إلى إدارة. تتعدد الفصول والمراجع والأشكال والنسخ، ثم تصل ملاحظات المشرف والممتحنين.

لهذا قررت مشاركة نفس طريقة العمل التي استخدمتها

الهدف هو توفير وقت إعداد الرسالة، وتنظيم العمل منذ أول فصل، وتسهيل المراجعة مع المشرف، ثم معالجة ملاحظات الممتحنين بوضوح.

كيف يساعدك القالب؟

1 تقسيم الرسالة إلى فصول وملفات يسهل التعامل معها

1

2 تنظيم الأشكال والجداول والمراجع والملاحق

2

3 تتبع التعديلات والرجوع إلى النسخ السابقة باستخدام GitHub

3

4 إعداد نسخة نظيفة ونسخة واضحة لمراجعة المشرف

4

5 توثيق كل ملاحظة من الممتحنين وربطها بالتعديل المناسب

5

6 إدارة العمل من بداية الكتابة حتى النسخة النهائية

6

النتيجة

وقت أقل لإدارة الملفات، ووقت أكبر لتحسين البحث والكتابة.

Open the guide, then build your first PDF

The repository contains the template, examples, setup instructions, and the full revision workflow.

Repository access notice

The repository is currently private. Students need an invitation from the owner before the link or clone command will work. Update this guide when public access is enabled.

1

Get repository access

Ask the repository owner for access while the project remains private.

2

Read the README

Choose the local VS Code route or the Overleaf route.

3

Replace the example content

Add your own metadata, chapters, references, figures, tables, and appendices.

4

Build and inspect

Run make all, then read every generated PDF before sharing or submitting it.

```
gh repo clone smaq777/uts-thesis-template-community
```

Important

This is an unofficial community template. Current UTS guidance, your faculty requirements, your examination outcome letter, and your supervisor's advice always take priority.
