

Thesis Revision Response

Student Name

A Structured Research Journey: A Synthetic Example Thesis

Important: This community document is an example, not an official university form. UTS students must download the current Thesis Revision Response template and follow their outcome letter, school, faculty, supervisory panel and Graduate Research School instructions.

ID	Examiner comment	How the recommendation was addressed	Page(s)
[E1-01]	The introduction should state the research gap more explicitly.	Added a concise research-gap paragraph that distinguishes the unresolved problem from the general topic background. The substantive correction is marked as E1-01-a in the review thesis.	2
[E2-01]	The methodology figure requires a clearer explanation in the surrounding text.	Added a numbered figure reference and explained the relationship between the design, evidence collection and analysis stages. The correction is marked as E2-01-a.	6
[E3-01]	Clarify the limitations of the illustrative results.	Added a limitations statement explaining that the values are placeholders and must be replaced with verified study evidence. The correction is marked as E3-01-a.	9

Student checklist

- Preserve every examiner comment verbatim and in report order.
- Respond to every comment, including comments requiring explanation but no text change.
- Build the final thesis before entering or confirming page numbers.
- Obtain all required supervisor and university approvals before submission.
